

InroomViewingDevice

For fMRI and patient comfort

Brand new InroomViewingDevice

This new 40" 4K UHD display has been designed to provide an optimal MRI compatible monitor that satisfies the needs of both clinical and advanced scientific applications.

With its slim design and height adjustable mobile foot stand, the monitor is easy to position anywhere in the MRI room. No interference is guaranteed on 1.5T and 3T scanners, even if the monitor is positioned right next to the bore.

One Product - Many Possibilities

The InroomViewingDevice is a multipurpose monitor. Thanks to its clever design and superior features, it can be used for fMRI, as well as for patient comfort.

Main Highlights

- Front-facing camera for patient surveillance
- Built-in USB hub
- When used for patient comfort, it can help reduce patient's anxiety, contributing to fewer aborted scans

Inroom Viewing Device

Multipurpose MRI compatible monitor

- fMRI for clinical and advanced scientific applications
- Patient comfort

Optimal Design

- Slim design
- Ultra high definition display
- Superior image quality
- MR vendor independent
- Designed for 1.5T and 3T

Flexible Positioning

- Height adjustable mobile foot stand
- Option for ceiling mounting
- Multiple positioning options

Key Technical Specifications

- 40" 4K UHD display
- Built-in USB hub
- DVI, DP and HDMI compatible
- HDCP support for DVD/Blu-ray
